

The stars have aligned.

Discover 100% capacity and 100% performance down to -22°F.

The new Orion XLTH+...a star performer in extreme weather.

Like the Orion Constellation brightening the winter night sky, the Fujitsu AIRSTAGE Orion XLTH+ Series stands out as a brilliant star for heating performance...even in the harshest climates. While others fade in extreme cold, Orion shines brighter, delivering more than 100% capacity even at -22°F.

- **Beyond 100% Performance at -22°F** – No derating, just powerful, consistent heating.
- **No Lockout Temperature** – Unlike other systems, Orion keeps running in relentless cold.
- **ProCore™ Corrosion-Resistant Technology** – Built to endure and perform.
- **Advanced Defrost Cycle** – Reduces downtime, maximizing comfort and efficiency.
- **Flexible Installation** – Designed for seamless integration into a variety of applications.

Orion XLTH+...the stellar performer in low-temperature heating.
